Personas

Persona : Farmer

KAMAL

PROFILE

Gender : Male
Age : 45
Location : Anuradhapura
Occupation : Farmer

BIOGRAPHY

Kamal, a 45-year-old farmer from Anuradhapura, is skilled in tree planting and passionate about restoring land health to fight climate change. With only basic smartphone knowledge and limited time, he needs a simple app that helps him easily track the growth of his trees in real time.

PERSONALITY

Introvert — Extrovert
Thinking — Feeling
Judging — Perceiving
Sensing — Intuition

SKILLS

- Basic smartphone usage
- Tree planting expertise

GOALS

- Combat climate change
- Improve land health

FRUSTRATIONS

- Limited tech knowledge
- Time constraint

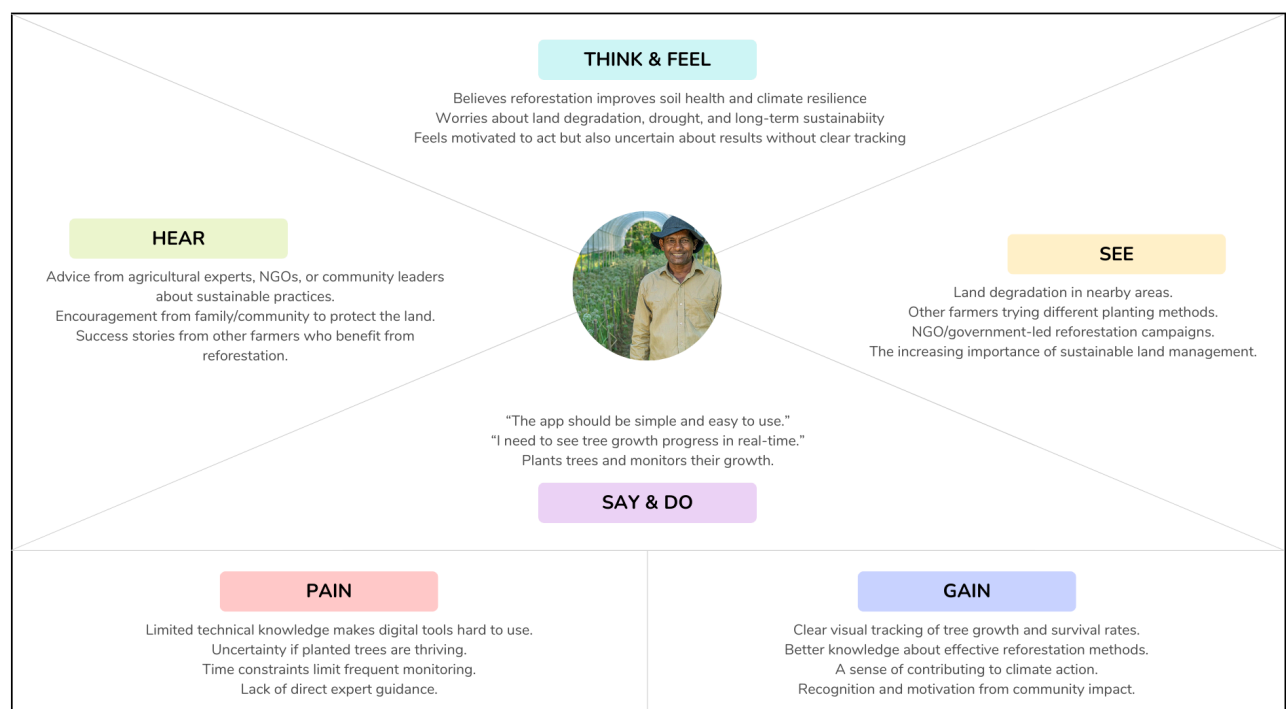

TECHNOLOGY

Software —
Social Media —
Mobile App —

NEEDS

- Simple app interface
- Real-time tree growth tracking

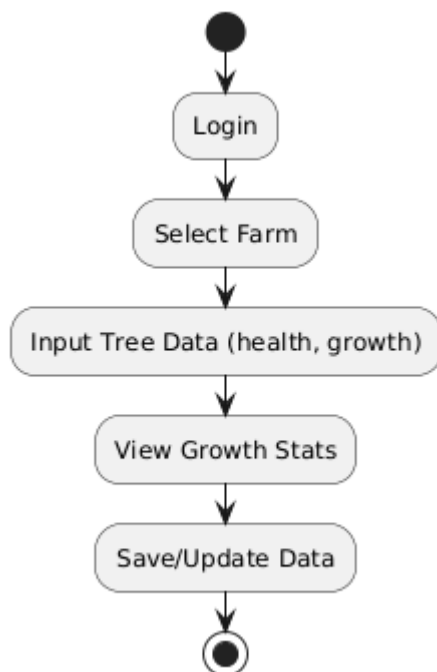

Empathy Map : Farmer

User Story : Farmer

- As a farmer, I want to log tree health and grow metrics daily to ensure reforestation success and enhance land productivity
- As a farmer, I want to view historical growth data to assess long-term reforestation progress.
- As a farmer, I want a simple interface to input tree data with minimal training to save time.

User flow : Farmer

Persona : Community Leader

Udana Perera

Community Leader

Biography

Udana has been leading local reforestation projects for nearly a decade. He works closely with villagers, students, and donors. His main challenge is keeping track of tree survival rates and showcasing collective impact to secure continued support.

Biography

Udana has been leading local reforestation projects for nearly a decade. He works closely with villagers, students, and donors. His main challenge is keeping track of tree survival rates and showcasing collective impact to secure continued support.

Goals & Objectives

- Organize and track community-wide tree planting activities
- Ensure survival through follow-up reminders for volunteers
- Access aggregated reports for NGOs and donors
- Motivate volunteers through recognition and gamification

Frustrations / Pain Points

- Lack of centralized system to track volunteers' contributions
- Time-consuming manual reporting (spreadsheets, paper forms)
- Volunteers forget follow-up care for trees

Needs from the App

- Community dashboard with overall planting stats
- Volunteer tracking with GPS and photos
- Automated survival/care reminders
- One-click report generation for donors

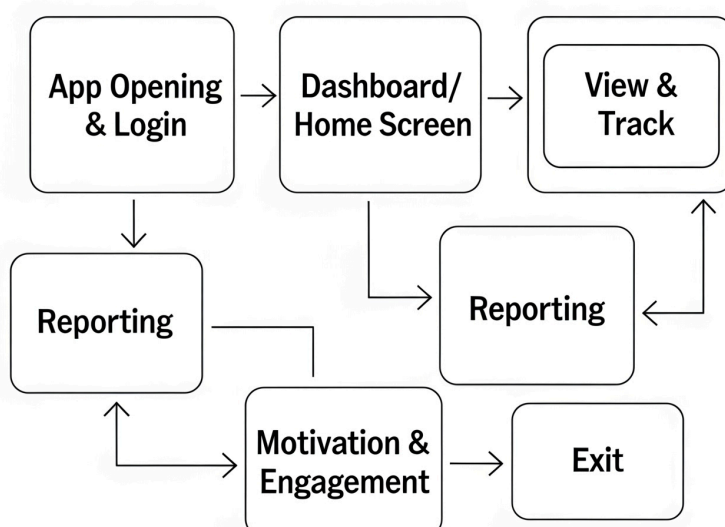

Empathy Map: Community Leader

User Story : Community Leader

- As a community leader, I want to see all trees planted by volunteers in one map so that I can monitor progress at a community level.
- As a community leader, I want to receive notifications about tree survival rates so that I can remind volunteers to care for them.
- As a community leader, I want to generate community-wide reports so that I can share transparent updates with donors and government bodies.

User flow : Community Leader

Persona: Volunteer Tree Planter

Sahan Perera

Volunteer Tree Planter

Age: 23 years	Country: Sri Lanka
Sex: Male	Education: Undergraduate
Marital status: Single	Occupation: University Student (BSc in Environmental Science)

BIOGRAPHY

Sahan is an undergraduate student passionate about environmental conservation. He frequently participates in community clean-ups, reforestation drives, and awareness campaigns. He wants to contribute more actively to tackling climate change by planting and caring for trees in urban areas.

GOALS AND OBJECTIVES

- Plant as many native trees as possible in his city.
- Keep track of all the trees he has planted.
- Ensure that trees survive by providing proper care.
- Share achievements with his friends and inspire others.

FRUSTRATIONS / PAIN POINTS

- Often forgets the watering schedule during exam times.
- Has trouble remembering the exact locations of planted trees.
- No easy way to prove his contributions to the community.
- Lack of guidance on proper tree care for different species.

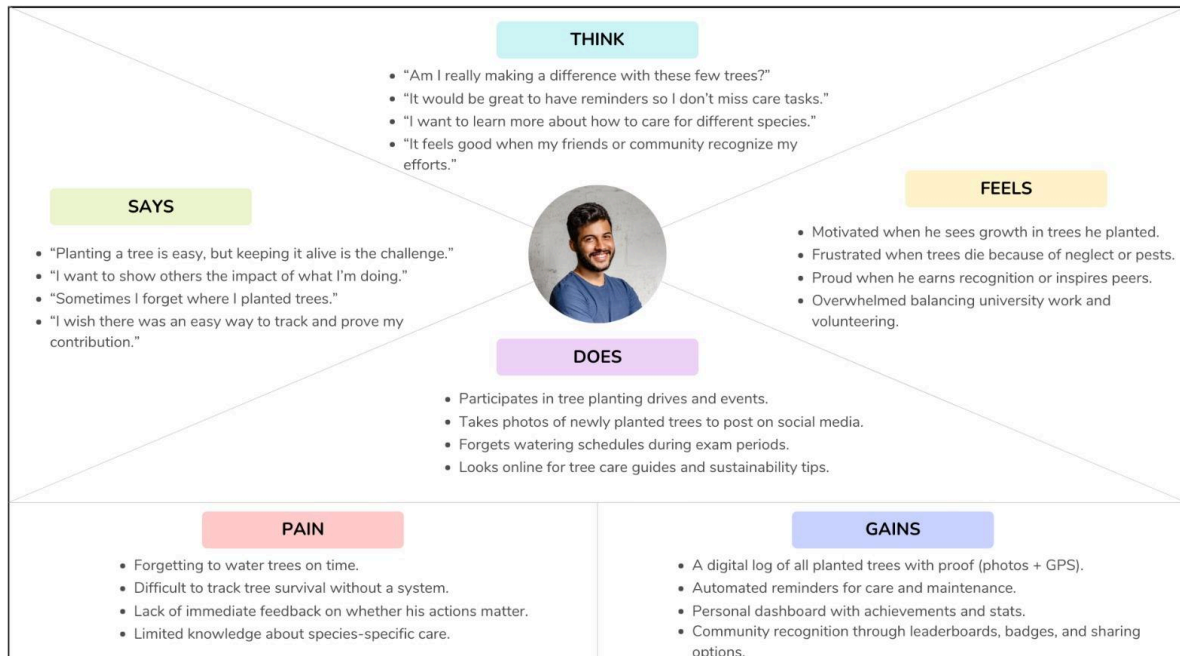

MOTIVATIONS

- Passion for environmental sustainability.
- Wants to inspire his peers to join reforestation activities.
- Likes receiving recognition (badges, leaderboards, social sharing).
- Feels proud when the survival rates of his trees increase.

NEEDS FROM THE APP

- Tree Planting Log: Add tree details (species, location via GPS, date, photo).
- Reminders & Notifications: Push alerts for watering and care schedules.
- Map View: See all his planted trees with health status.
- Progress Dashboard: Personal stats (total trees planted, survival rate, CO₂ absorbed estimate).
- Gamification: Badges for milestones (e.g., "Planted 10 Trees", "Care Streak 7 Days").
- Community Sharing: Option to post updates on social media or within the app community.
- Learning Resources: Quick care tips and guides for native species.

Empathy Map: Volunteer Tree Planter

User Persona: Casual caretaker

SANDUNI PERERA

PROFILE Gender : Female Age : 28 Occupation : Primary school teacher Location : 18/117, horahena road, hokandara, Sri Lanka.	BIOGRAPHY Sanduni is environmentally conscious but doesn't have the time to commit to large-scale volunteering. On her way to work or during evening walks, she notices community trees and often waters them using nearby resources. She isn't the planter, but she feels responsible for keeping them alive.	PERSONALITY  Thinking Feeling  Sensing Intuition
	MOTIVATIONS - Wants to see her neighborhood greener and healthier - Feels good when contributing, even in small ways. - Likes community acknowledgment (badges, leaderboards, or thank-you notes). - Wants to encourage her students to care about the environment. GOALS - Contribute to the environment in small but meaningful ways. - Help keep community trees healthy. - Quickly log tree care activities without lengthy processes. - Feel recognized for her contributions, even if casual. FRUSTRATIONS - Doesn't have time for lengthy data entry or event participation. - Often forgets when a tree was last watered or cared for. - Feels that casual contributions usually go unnoticed. - Sometimes unsure if she's taking the right care steps for a tree. User story: Casual caretaker

Sanduni's User Story

Quick Care Logging

As a Casual Caretaker, I want to quickly log when I water or care for a tree, so that I can contribute without spending too much time.

Reminders & Suggestions

As a Casual Caretaker, I want reminders or suggestions about nearby trees needing care, so that I can help during my daily walks.

Simple Guidance

As a Casual Caretaker, I want short and simple care tips for each tree species, so that I know I'm helping the right way.

Recognition & Motivation

As a Casual Caretaker, I want to earn badges or recognition for my contributions, so that I feel motivated to keep helping.

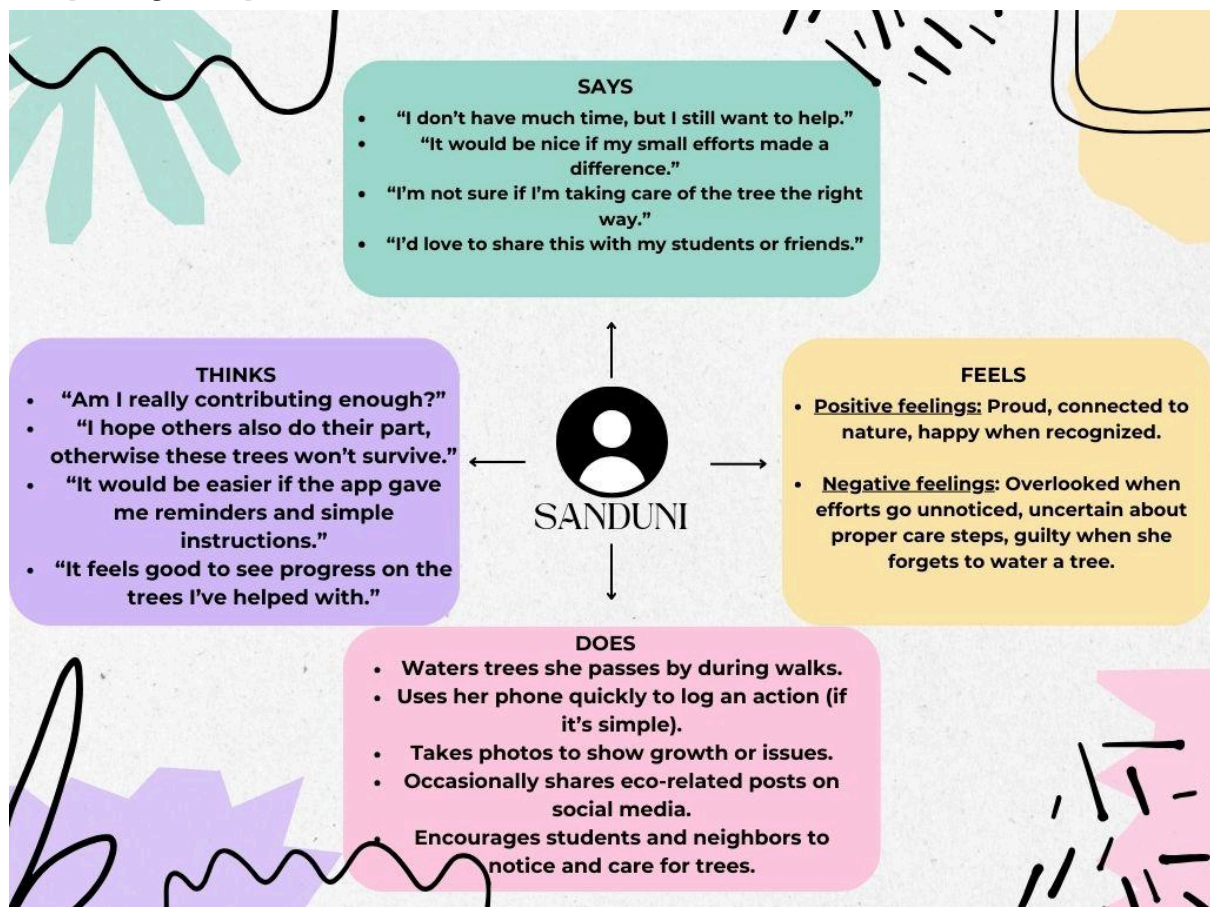

Community Impact

As a Casual Caretaker, I want to see how my small contributions add up to the community's reforestation progress, so that I feel part of something bigger.

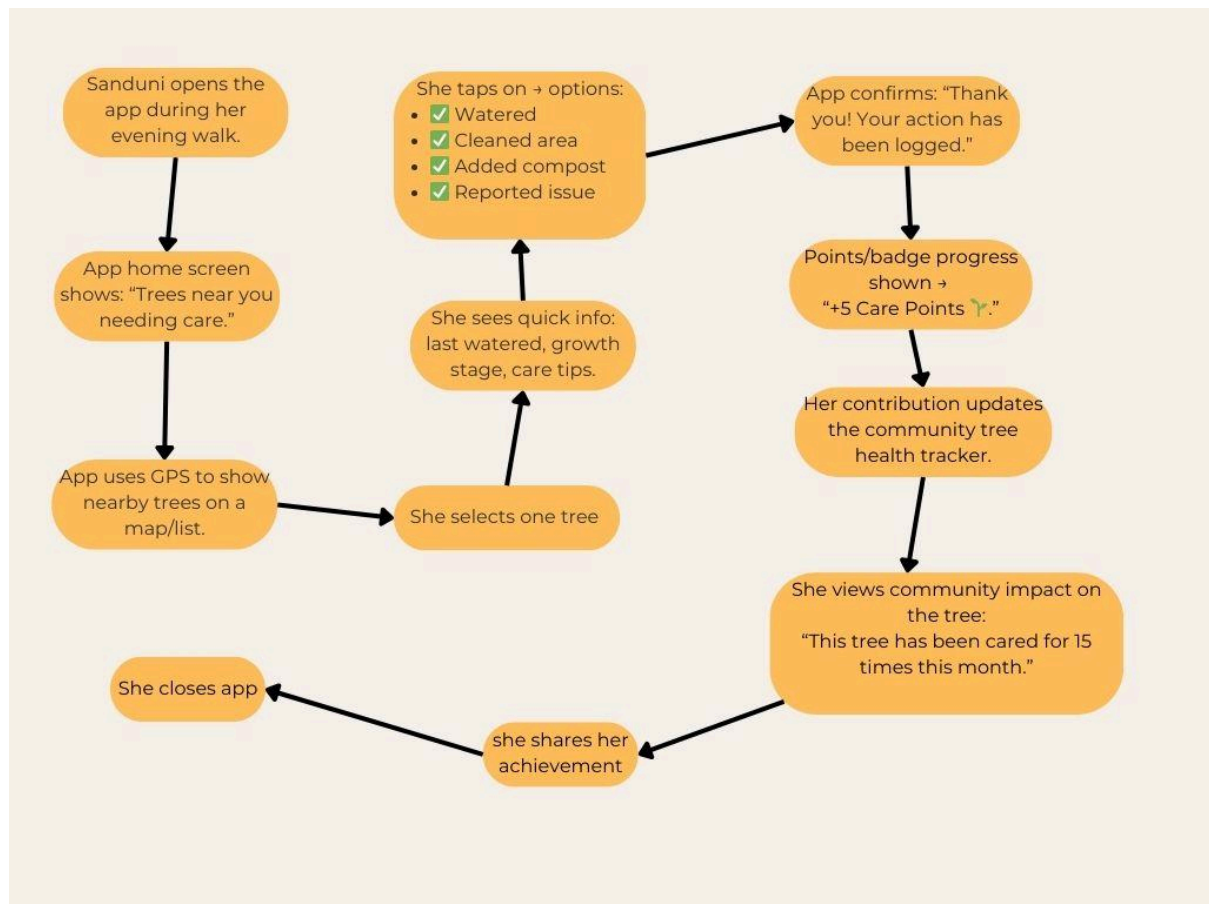

Quick Reporting

As a Casual Caretaker, I want to report issues like pests, damage, or drought with a quick photo, so that experts or organizers can take action.
